

Mediflex® Nubert Bag

The Reposable Tissue Retrieval Bag System!

Mediflex combines a specially modified reusable grasper to insert, open, close and withdraw a laparoscopic tissue retrieval bag!

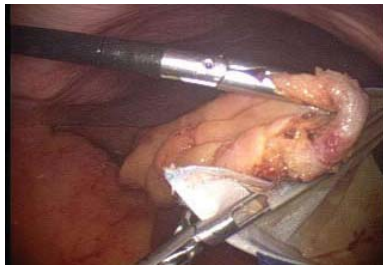

- Tear Resistant Polyurethane-coated, Rip-stop Nylon, 120ml capacity
 - Impervious to fluids
- Stitched and RF Welded Seams
 - Burst Strength of 20 PSI
- Nickel and Latex Free
- Tapered Design Prevents “Bunching” of Tissue and Facilitates Removal from Trocar Site
- Packaged without an Insertion Handle - a Fully Reusable Specialty Modified Modular Grasper is used instead
 - This takes up about 93% less storage space than other retrieval systems
 - Reduces Hazardous waste
- Multiple-use. Insert/Extract, Open/Close as many times as is needed during one procedure. No need to open additional bags.
- Now available with optional drawstring

Mediflex®
SURGICAL PRODUCTS

The First Reposable Laparoscopic Tissue Retrieval System

Adding small offset slits in the collar of the Nubert bag allows the Mediflex-Nubert Grasper to be inserted into the collar. This permits unlimited opening and closing of the bag as shown above. Many disposable laparoscopic retrieval bags can be closed once; then they must be discarded.

One hand opens the bag with the modified Mediflex Grasper while the specimen is placed in the bag with a standard grasper.

Ten Disposable Mediflex Nubert Bags take less than 1/15th the foot print of 10 fully disposable bag/handles.

Strong, radio opaque, fluid impervious, affordable and...the world's first **Reposable Endo Bag System!**
